

I have recently been informed that the FCC is considering changes that may replace FM translator stations with LPFM (Low Power FM). I listen to KLOVE often and am worried that this proposed idea may affect my local station. I would like to encourage you to not proceed with this action as it may affect my ability to listen to K-LOVE. K-LOVE provides worthwhile programming which makes my community a more enjoyable place to live. If K-LOVE were to be forced off the air because of these LPFMs I believe that the community would suffer. Please do not allow this to proceed.

Thank you for you time,
Matt Ruwe
